

V556 & V557

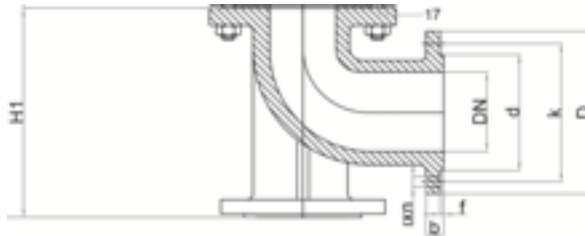

N-PART & HYDRANT KEY

Product Description

V556 N-Part is the supporting part for both above & underground fire hydrants to the connection of the water main. It maintains 90C connection to the pipeline and in addition supports the hydrants to stay fixed on their installed point with inbuilt duck foot shape design. Available in Cast Iron or Ductile material.

V557 Hydrant Key is the operation element for above ground hydrants to open and close when needed. Available is steel or cast iron material.
